English

HAILO WIND SYSTEMS

Service you can rely on!

Hailo Wind Systems is one of the world's market and technology leaders for professional access and climbing solutions in the wind energy sector.

Quality, reliability and safety always come first with all of our products and services. Always made to measure for our customers - worldwide.

Hailo Wind Systems - High Level Access Solutions.

THE FASCINATION OF WIND ENERGY

We stand for performance and passion

There are only a few sectors anywhere in the world that have as much change as the wind energy sector. Reliable partners with high quality, costefficient services are an absolute must if you want long-term success.

This is why Hailo Wind Systems, in addition to the well-known ladder systems, customized service lifts, state-of-the-art fall arrest solutions, smart movable platforms and intelligent climb assists also offers the complete range of services for professional access technology in wind turbines.

As well as installation, maintenance, repair and replacement of these components, we offer excellent services for ropes, rope suspensions, hoists, platforms, doors, PPE, crane systems, first aid and rescue equipment and much more. Onshore and offshore.

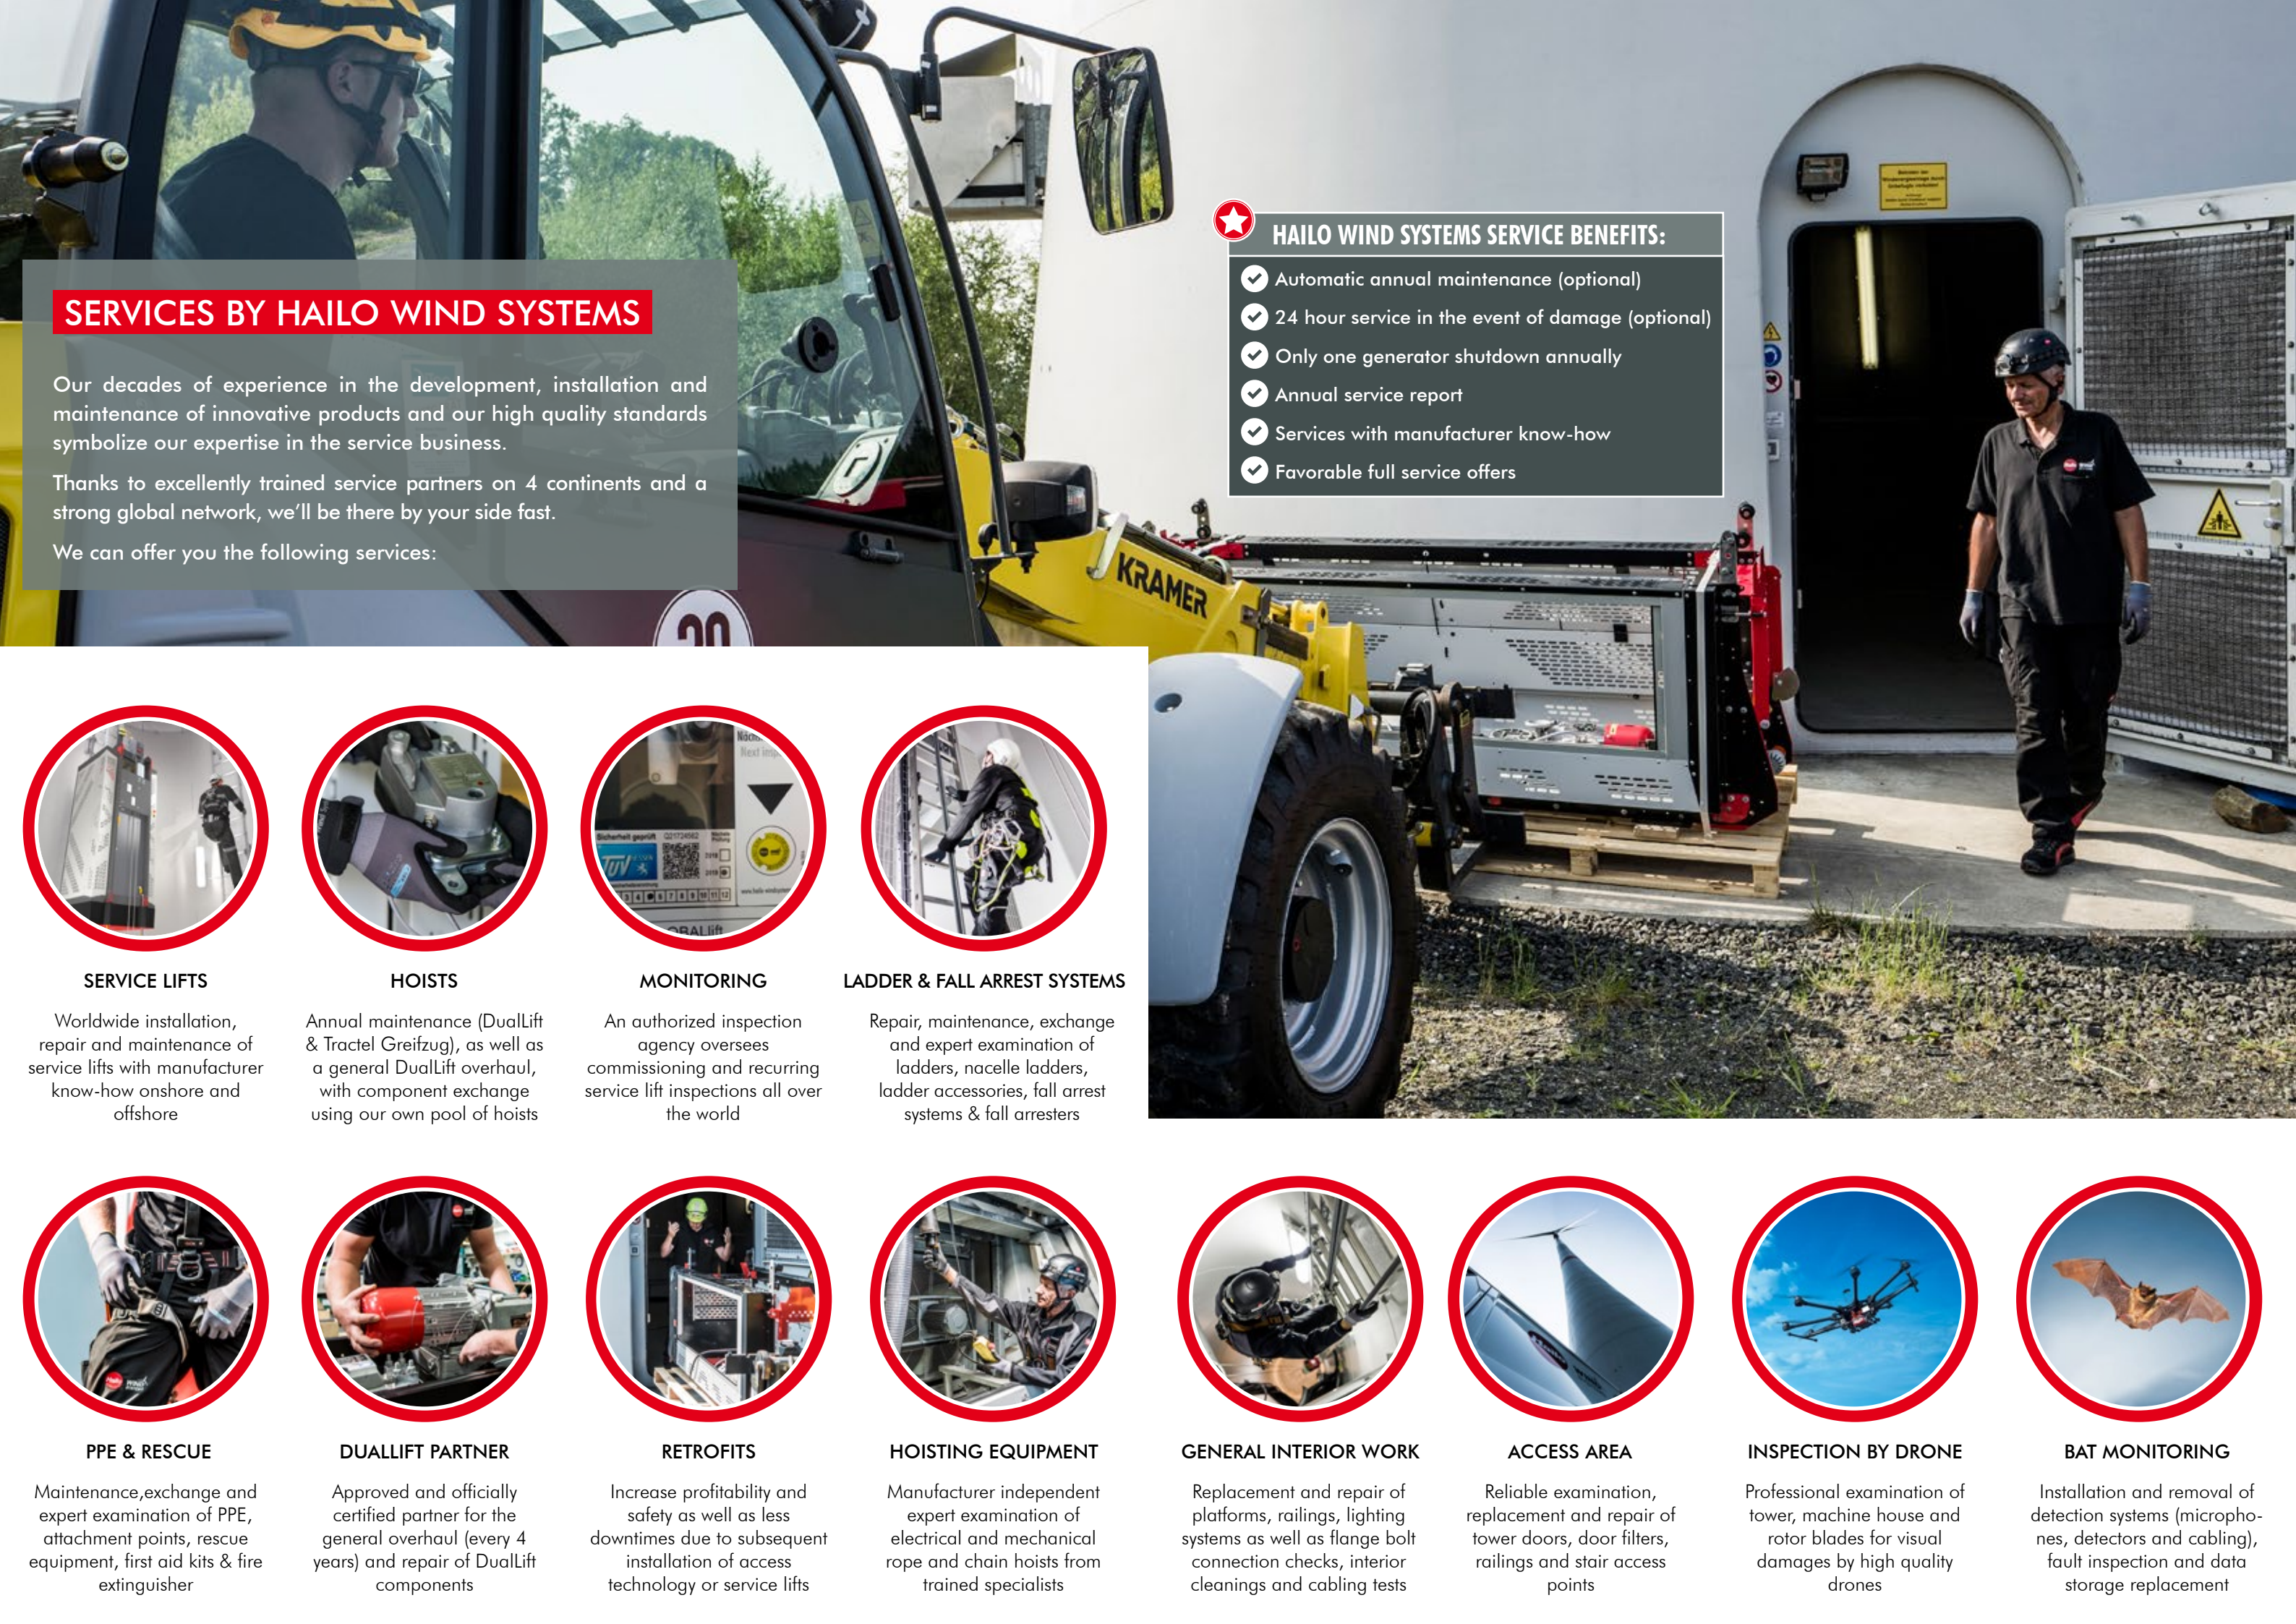

With own subsidiaries and service-centers on 4 continents, we support you with competent contact person and excellently trained service technicians worldwide and at any time. Our fully equipped service buses enable us to perform most repairs and maintenances quickly and economically on site. The satisfaction of our customers is always our top priority.

We are proud of our passionate contribution to sustainable energy generation and increased safety in wind energy turbines. And you can feel this enthusiasm in all of our projects.

SERVICES BY HAILO WIND SYSTEMS

Our decades of experience in the development, installation and maintenance of innovative products and our high quality standards symbolize our expertise in the service business.

Thanks to excellently trained service partners on 4 continents and a strong global network, we'll be there by your side fast.

We can offer you the following services:

HAILO WIND SYSTEMS SERVICE BENEFITS:

- ✓ Automatic annual maintenance (optional)
- ✓ 24 hour service in the event of damage (optional)
- ✓ Only one generator shutdown annually
- ✓ Annual service report
- ✓ Services with manufacturer know-how
- ✓ Favorable full service offers

SERVICE LIFTS

Worldwide installation, repair and maintenance of service lifts with manufacturer know-how onshore and offshore

HOISTS

Annual maintenance (DualLift & Tractel Greifzug), as well as a general DualLift overhaul, with component exchange using our own pool of hoists

MONITORING

An authorized inspection agency oversees commissioning and recurring service lift inspections all over the world

LADDER & FALL ARREST SYSTEMS

Repair, maintenance, exchange and expert examination of ladders, nacelle ladders, ladder accessories, fall arrest systems & fall arresters

PPE & RESCUE

Maintenance, exchange and expert examination of PPE, attachment points, rescue equipment, first aid kits & fire extinguisher

DUALLIFT PARTNER

Approved and officially certified partner for the general overhaul (every 4 years) and repair of DualLift components

RETROFITS

Increase profitability and safety as well as less downtimes due to subsequent installation of access technology or service lifts

HOISTING EQUIPMENT

Manufacturer independent expert examination of electrical and mechanical rope and chain hoists from trained specialists

GENERAL INTERIOR WORK

Replacement and repair of platforms, railings, lighting systems as well as flange bolt connection checks, interior cleanings and cabling tests

ACCESS AREA

Reliable examination, replacement and repair of tower doors, door filters, railings and stair access points

INSPECTION BY DRONE

Professional examination of tower, machine house and rotor blades for visual damages by high quality drones

BAT MONITORING

Installation and removal of detection systems (microphones, detectors and cabling), fault inspection and data storage replacement

THE RETROFIT SPECIALISTS

Experience of over 400 retrofit projects

Wind turbine retrofits require experienced, reliable and professional partners. Customized planning and implementation are the key drivers to successful retrofit projects.

We therefore offer you comprehensive retrofit services such as service lifts, ladders or fall arrest systems installations to increase the profitability and safety of any wind turbine.

All retrofit services benefit from our extensive manufacturer's know-how. Worldwide.

THE BENEFITS OF RETROFITS

COST REDUCTION

Investing in order to make verifiable long-term savings: Retrofits stand for high cost savings over the entire life cycle of the wind turbine.

TIME SAVING

Time-consuming faults, turbine downtimes and the time required for maintenances, inspections and repairs are reduced significantly.

INCREASED REVENUE

Our retrofit solutions verifiably help increasing the profitability of wind turbines, for example due to less service or fault downtimes.

GREATER (WORK) SAFETY

We support you with high quality and reliable access technology. Whatever you need: We offer you professional solutions for increased safety.

IMPROVED HEALTH PROTECTION

Who says that service work needs to be back-breaking? Our retrofit solutions enable you to avoid painful injuries and major physical stress.

FOCUSSING ON MAIN TASKS

Our services and products stand for reliability, quality and safety. Trust us! We will support you to concentrate on your business, especially in the long term.

UNEXPECTED TRANSPORTATIONS

Our products enable you convenient transportations of urgently required spare parts, tools and much more without any problems or stress.

SERVICE BY HAILO WIND SYSTEMS

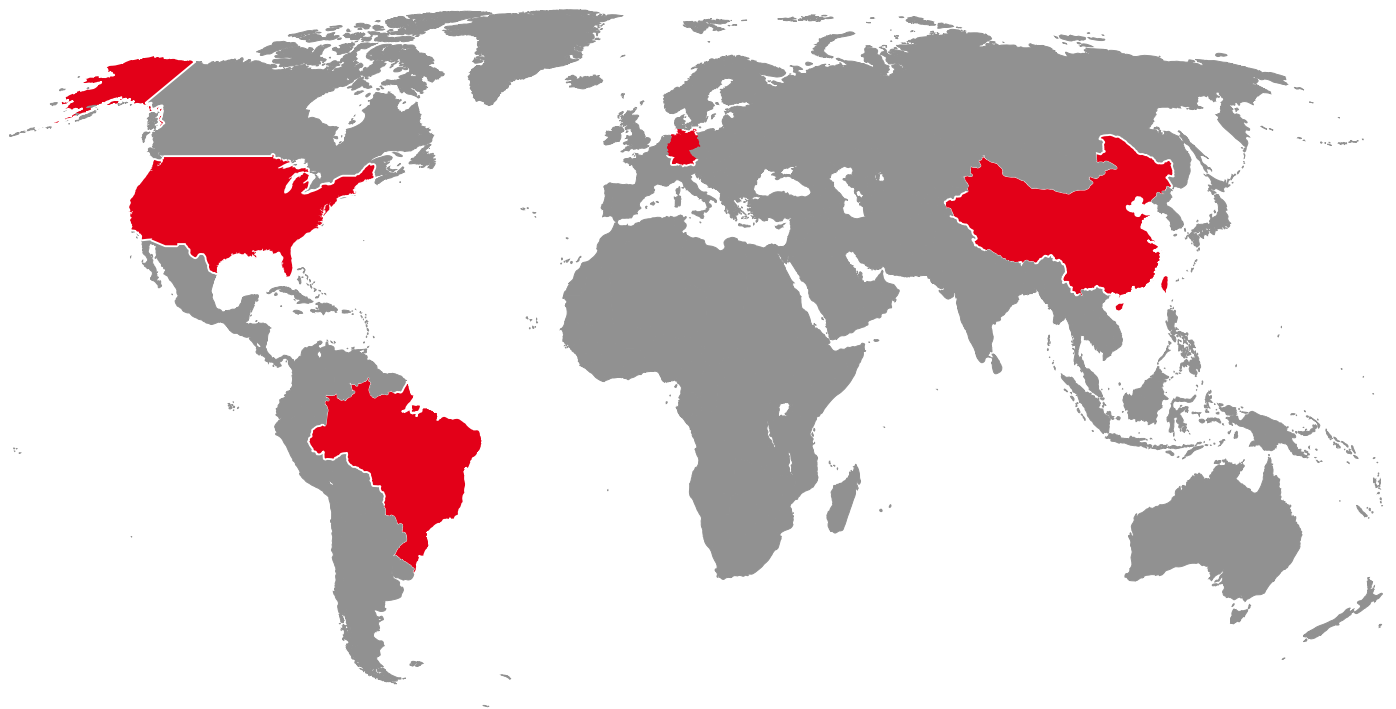

High Level Access Solutions

Quality, reliability and safety always come first for us in all of our services.

Whether for service lifts access technology, hoists, PPE, crane, monitoring, offshore or retrofit projects: Our highly motivated and competent service employees will be on-site fast. Worldwide and at any time.

Hailo Wind Systems - High Level Access Solutions.
